GOLF TIP: TEE SHOTS

Many golfers have too many thoughts in their head before teeing off. If you are thinking about too much on the first tee box or elsewhere, this can hold you back from playing your

best golf. Do most of your thinking on the tee box before you swing. Pick your landing area and play away from danger. Visualize your shot and have a specific target. Focus on solid contact and commit to your shot. Take a couple practice

swings and whatever you do in your normal routine. When you address the ball, make sure your grip is relaxed and take a deep breath. Your tee shot will set you up for the rest of the hole and a chance to shoot a low score.
