## REPAIRING BALL MARKS

If golfers fail to repair a ball mark, there can be long lasting damage. Unrepaired ball marks can take weeks to heal. However, a repaired ball mark can heal in about a week. Ball marks can cause balls to bounce off line. It

is important to be mindful of repairing your ball mark, and any unrepaired marks nearby. Any single-pronged and fork-tools can be used to effectively repair the mark, including a tee. Using proper technique will help the mark heal. Insert the tool behind the ball mark and gently push the top of the tool toward the center of the indentation. Tap down the mark with your putter to smooth the surface. After hitting a great shot into a green, fix your ball mark and help our superintendent maintain high quality playing conditions.

### GOLF TIP: BUILDING A PRE- SHOT ROUTINE

For each shot you take, start with the mindset that you will consistently approach the ball in the same manner. A good routine starts from

behind the ball. This is where you look down your line of play and visualize the shot. Make a practice swing and get the feel of the swing you want to make for the shot. After you line up your shot, set up your club on the target line and then

get your body set. To keep it simple, take your stance and grip the club the same way. Also, take the same number of waggles each time. Your game will progress toward more consistent swings and improved scores by building a pre-shot routine.
